

MIG NB 500

NB 500 is Inverter IGBT MIG welding machine with External Remote Control Wire Feeder. The machine is packed with unique features inductance current control and the advance of constant voltage control designed for flexibility if the welding applications. User can add-on trolley and water tank.

ADVANTAGES

- ✓ Compact Design
- ✓ Microprocessor Control
- ✓ Comprehensive protection function
- ✓ Unique Air Duct Design
- ✓ Unitization design
- ✓ 2 Year Warranty
- ✓ Manufacturing under (CE) Certificate

BASIC UNIT INCLUDE

- ✓ PANA 500 MIG Torch
- ✓ 5 meter wire feeder
- ✓ Heater Regulator

OPTIONAL ADD-ON:

- ✓ Trolley

MIG NB 500

PARAMETERS

Model	NB500		
	MMA	MIG	
		Adjustment range	Preset
Input power voltage (V)	AC415V±15% 3PH		
Input voltage frequency (HZ)	50/60		
Rated input power capacity (KVA)	23.5	23	
No-load voltage (V)	77	77	
Output current range (A)	40-500	40-500	
Pre-flow (S)		0-20	0
Post-gas		0-20	0
Burn back time		0-20	0
Up-slope (S)		0-20	5
Duty Cycle (%)	60%		
No-load consumption (W)	60		
Weight (KG)	41		
Dimension (mm)	622×280×480
